TEN COMMANDMENTS FOR CLIMATE DREAMERS

by

Dan Youra

Dan Youra is a political commentator and cartoonist, known for his caricatures of political leaders. His wit is recognized for its not-so-subtle satire and irony. Politicians who are the targets of Youra's barbs request autographed copies, not apologies.

I'm going
to get rid of
all fossil fuels
by next year.

PREFACE

The Ten Commandments in the Hebrew Bible establish a set of ethical principles, which spell out how people should relate to one another and to God.

This book, *Ten Commandments for Climate Dreamers*, conjures up a new paradigm of how combatants in the climate wars would do well to consider a new relationship among themselves and toward carbon. Carbon is arguably the most significant element driving the debate and policies today. Carbon and carbon dioxide are at the center of the debate about the impact of humans on climate change. Carbon is condemned by its detractors as the grim reaper, driving the planet toward extinction. Defenders of the black gold promote the atom's value as essential to life on Earth.

The book's plea is for a reawakened acknowledgment of the carbon atom. Love it or hate it, carbon defines life. It is here to stay. Accommodation to the little atom is healthier than alienation from it.

INTRODUCTION

Be A Climate Dreamer

The climate debate has been raging for 30+ years. It is characterized by intense competition between the anti-carbon and pro-carbon armies.

The so called debate shares more in common with a cockfight than it does with scientists pursuing truth. The climate circus has devolved into a boxing bout or a wrestling match.

This book offers an alternative paradigm, a way for opponents to redefine their relationships toward one another and recognize common challenges and mutual interests.

The plea is for a cessation of hostilities. The trick is to not identify as antagonists. Shift the emphasis away from the wrestling match and cockfighting metaphors. Even drop the debate fantasy. What debate? Oh, you mean the yelling match?

Ask yourself this question:

What is my dream for my planet?

Put down your thermometer, your gas mask, and your protest sign. Dial back your identity as a climate changer. You, a climate expert?

Identify yourself as a *Dreamer*. A *Climate Dreamer*. Drop the "Climate Complainer," the "Climate Scaredy-Cat ? The "Climate WorryWort," the "Climate Know-it-all".

This is your climate dreamer mantra.

You are the dream. And the dream is you.

It is a return to self health. Be occupied with your own dream. Don't be a lemming. Don't sign up as another Chicken Little for the planet. It doesn't help you. It hurts you. It doesn't help the people around you. And it doesn't help the planet.

Rather, sign up as a *Climate Dreamer*. Dream about the planet's future that you desire. Don't follow someone else's nightmare.

Dreaming defines the nature of the challenge. Become more personal to grasp what is going on. The big changes in history come from individual dreamers, not from Group Thinkers.

A model dreamer I recommend for you is Mickey Mouse as the Sorcerer's Apprentice. One mouse musters an army of brooms, while dreaming of commanding the stars, the planets and the water. We all dream.

TEN
COMMANDMENTS

FOR CLIMATE DREAMERS

I

I AM CARBON
THOU SHALT NOT HAVE
OTHER ATOMS BEFORE ME

II

THOU SHALT NOT TAKE THE
NAME OF CARBON IN VAIN

III

KEEP HOLY *CARBON DAYS*

IV

HONOR YOUR CARBON HERITAGE

V

THOU SHALT NOT KILL CARBON

VI

THOU SHALT NOT
ADULTERATE CARBON

VII

THOU SHALT NOT STEAL CARBON

VIII

THOU SHALT NOT LIE ABOUT CARBON

IX

THOU SHALT NOT COVET
CARBON COUNTRIES

X

THOU SHALT NOT COVET
CARBON PLANETS

IF YOUR GOAL IS TO RID THE PLANET OF CARBON, THIS IS WHAT YOU ARE UP AGAINST

CARBON

- 4th most abundant atom in the universe
- 15th most abundant element on Earth
- 20% of the weight of a human body
- 95% of known compounds
- 10 million carbon compounds discovered
- Diamonds are made of carbon
- Word “carbon” from Latin “carbo” = coal

CARBON DIOXIDE

- One carbon atom plus two oxygen atoms
- 0.04% of Earth’s atmosphere
- Humans exhale avg 2.3 lbs. CO₂/day
- Humans exhale 28,000 ppm CO₂/breath
- 7,000 ppm = avg CO₂ in Space Station
- 4,000 ppm = avg CO₂ level in submarines
- 400 ppm = CO₂ in atmosphere

Confiscate all CO2
from the planet.
But, don't confiscate
the bubbles from
my drinks.

I
I AM CARBON
AND I SHALL NOT
HAVE OTHER ATOMS
BEFORE ME

Carbon is just as important an element as oxygen for sustaining life on planet Earth.

No carbon. No life.

Do you know that ALL living creatures are made of or depend upon carbon. Do humans depend upon carbon to survive?

___ yes ___ no

Answer: Yes

Dan Youra
©2022 Youra Media

Mammals (humans) exhale carbon dioxide (CO₂). Plants absorb CO₂. [Caution: The eradication of carbon from Earth would cause the extinction of all life on Earth.] Approximately how much CO₂ do you exhale in each breath measured in parts per million?

__400 ppm or __28,000 ppm

Correct Answer: 28,000

II

THOU SHALT NOT TAKE THE NAME OF CARBON IN VAIN

CARBON is the 4th most abundant element in the Universe? It is the 15th most abundant on Earth.

Earth's estimated 65,500 billion metric tons of Carbon are stored in rocks and in the oceans. The carbon haters, who want to rid the planet of all carbon, have a Herculean task ahead of them. How do you get rid of 65,000 billion metric tons of carbon? It is easy

to yell. "Get all the carbon off of planet Earth." It is another problem all together to actually try to do that.

Where do you put all those tons and tons and tons and tons of carbon?

Answer: DON'T KNOW

III

KEEP HOLY

CARBON DAYS

If you want to scrub the planet of all CO₂, what should be done with all the carbon in your body? 20% of your body is carbon.

Which of the following should be done with the carbon in your body?

Recycle Yes No

Sequester Yes No

Cap & Trade Yes No

Net Zero Yes No

Carbon Offset Yes No

Footprint Yes No

Just because carbon is thought of as associated with coal and oil does not mean that carbon is "bad." We do well to celebrate the life-giving benefits of carbon and Keep Holy **Carbon Days**. Recognizing that

"Everyday is Carbon Day."

Carbon will be
a bigger
money-maker
than taxes

IV

HONOR YOUR CARBON HERITAGE

Carbon is a parent to all humans as much as Adam and Eve or our own parents are.

Carbon makes up 18% of the human body. It is the main component of sugars, proteins, fats, DNA, and muscle tissue, pretty much everything in your body.

Bone is about 15% carbon by weight, meaning that each gram of bone contains roughly 7.5×10^{21} carbon atoms. Our carbon heritage will be even richer, when the world

realizes that fossil fuels (oil and gas) aren't really fossil (made from dead snails and prehistoric dandelions). Nor are they limited.

Once it is commonly understood that fossil fuels, I mean petroleum products, are being created and not being depleted,* we can stop the insanity of the limited resource narrative.

V

THOU SHALT NOT KILL CARBON

If you wanted to kill all the carbon and CO₂ on planet Earth, where would you start? Which carbon atoms would you burn? Which could you spare? Which carbon atoms would you be willing to give up and live without? If the government levied a tax on all the CO₂ you exhale, would you be willing to pay the CO₂ tax?

What about diamonds? They are 100% carbon. Would you destroy all diamonds? Why is carbon the

only element on the Periodic Table that you want banned? What about Oxygen? Hydrogen? What about gold and silver? Are oil and gas on the Periodic Table? ___ No ___Yes

Answer No

Ban the Periodic Table!!!!

Dan Youra
©2022 Youra Media

VI

THOU SHALT NOT ADULTERATE CARBON

Have you met any of the 97% of scientists who believe in global warming? No. Of course not. They don't exist and never did exist. The lie is an adulteration of carbon facts.

How many years do you think it will take society to get rid of all the oil and natural gas (fossil fuels)?

1 yr 20 yrs 100 years? Never.

Why or Why not?

Don't fall for the propaganda of the anti-carbon thugs, media, and teachers who want you to eat bugs to save carbon.

Guess how much carbon bugs have inside their little crunch cells?

VII

THOU SHALT NOT STEAL CARBON

Pervasive carbon theft is going on all around the world, especially by the Carbon Cult of world leaders. All government leaders are in on the con, the gig, the grift, making off with trillions of dollars by forcing their citizens to buy into the carbon nightmare that they have created.

The forms of the theft are called “carbon taxes,” “trade offs,” “sequestration,” and “setbacks.” These are all disguised taxes. The biggest

For Climate Dreamers promoters of the carbon rip offs are the biggest fraudsters who promote it and benefit from it. Guess who? The governments, of course. They tax you without calling them taxes.

The Carbon Cult is also stealing your freedom. As long as they can keep you brainwashed into thinking that you are the cause of the alleged global warming, they have you contained within the prison of your mind.

**META
Theft
Is
Okay**

XIII

THOU SHALT NOT LIE ABOUT C(LIE)MATE

The lies about the climate charade, the global con, are greater than the sum total of all the CO2 molecules floating around Earth.

NEWS FLASH

**CARBON HATER
ARRESTED FOR
HATE CRIME**

Dan Youra
©2022 Youra Media

The lies can fill up the greenhouses circling Earth, the ones full of all those greenhouse gases, which might make the planet lighter than air and cause it to float out of its orbit and leave the solar system.

That event will be the most spectacular climate change you can imagine.

IX

THOU SHALT NOT COVET THY NEIGHBOR'S COUNTRY

Carbon in the form of CO₂ arises out of the oceans in quantities too enormous to even begin to comprehend. Anti-carbon militants don't say a word about gigantic quantities bubbling up from the seas. However, when a couple CO₂ molecules bubble out of the ground attached to an oil or natural gas molecule, the anti-carbon zombies go nuts and clamor for a Carbon Free World.

Countries around the world keep their eyes open looking for new opportunities to lay claim to oil and natural gas

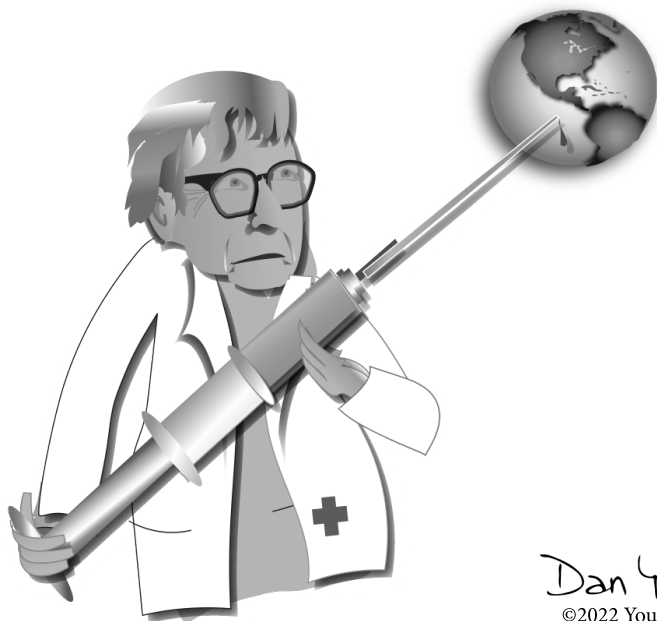

Dan Youra
©2022 Youra Media

molecules seeping up to the surface across the fence in neighboring countries. Countries go to war to fight over the ownership and control of the little, black, carbon molecules.

X

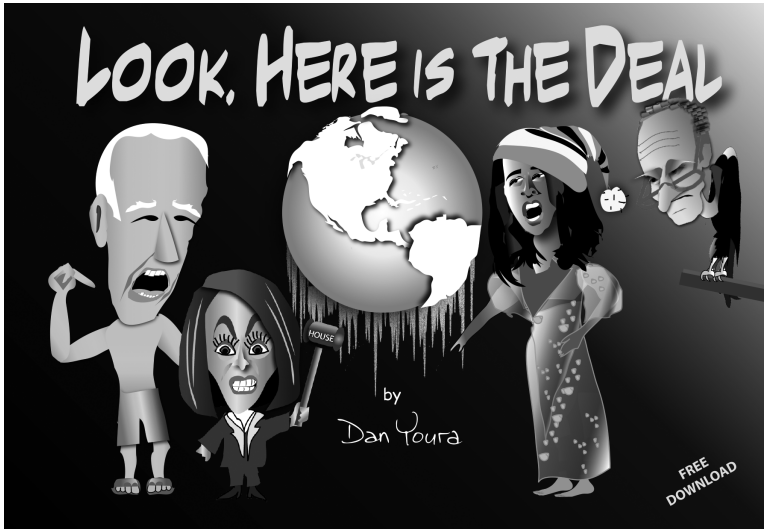

THOU SHALT NOT COVET THY NEIGHBOR'S PLANET

Some industrious big thinkers try to solve new planetary problems with old solutions they conjured up in a previous time. Grandiose thinking inspires the god figures among us to covet control of this planet and harbor delusions of conquering nearby planets. Who gives these god-wanna-be's the franchise to open an umbrella over the Earth, paint the snow black, or hang aluminum foil across the sky in their attempts

Dan Youra
©2022 Youra Media

to change the weather? Who can stop the planetary maniacs from injecting our planet with voodoo vaccines? These planet pirates should be required to spend a couple years in a mental hospital working out the bugs in their delusions. The grass is always greener on the other side of the orbit. The New Planet Order and the Planet Economic Forum are leading the way.

Look, Here is the Deal

by Dan Youra

Through the caricatures of Dan Youra, *Look, Here Is The Deal*, exposes the bumbblings and deceptions of political leaders promoting global warming and climate change as existential threats to the planet. 50 pages of Youra's colorful caricatures capture the interactions between national politicians and Dear Leader.

**C(lie)mate Chains – The Lie
That Enslaves Us**

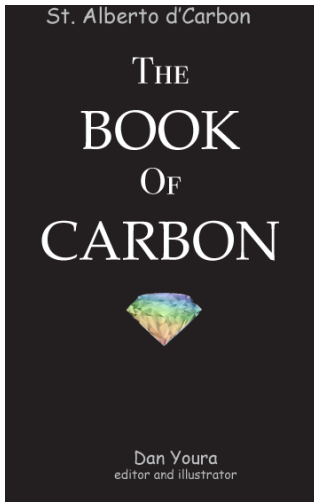

by Dan Youra

C(lie)mate Chains, exposes the lies about global warming with quotes directly from the mouths of the political leaders. The book features 30 colorful caricatures by Dan Youra, accompanying quotes, and also links to scientific reports refuting or, at least, questioning global warming and climate change.
