

Welcome

The phrase “*Look. Here Is The Deal*” is easily recognized as one of President Joe Biden’s most often used expressions. He utters it to punctuate his thoughts, nail down a position, negotiate an outcome, impress the gullible, a stalling tactic, or when nothing else pops into his brain.

The phrase “*Look. Here Is The Deal*” is also appropriate as the title for this book. This book is a very action-packed deal for you the reader. It appears to be a book of cartoons. It is that and much more!

Dan Youra’s caricatures of political leaders are fun, satiric, and “acerbic,” as reviewers have tagged the artist’s work.

The book features links on the bottom of each page to scientific research reports. See list on pages 44-45.

What first appears to be a playful comic book is actually a very critical expose of the climate alarmists’ pseudo science, refuted by the science of experts.

Credits

Special credit is due to Michael Wells Mandeville, author of *Solar Alcohol: The World’s Most Advanced Scientific Predictions for 2021-2100*, for assistance in identifying scientific studies to support the thesis of this book. Special gratitude is extended to James G. Matkin and Academia.edu for links to excellent, scientific research to help refute the ersatz proclamations of climate alarmists. Inspiration for tackling this book is owed to Don J. Easterbrook, Professor Emeritus of Geology at Western Washington University, Bellingham, WA and editor of *Evidence-Based Climate Science: Data opposing CO2 emissions as the primary source of global warming* for his pioneering efforts in leading the charge for truth and evidence-based inquiry.
