CARBON DOSSIER

The climate war
will not be won on the science.
It will be won with the fall of those
pushing human caused
climate change.

Join the fight.

CARBON DOSSIER

CARBON TAX IS A TAX ON LIFE ITSELF

by

Professor Jon Swift

CARBON is the most criminal element on the periodic table. It is charged with crimes against humanity. It is judged guilty of genocide. And, it is condemned to greenhouse gas chambers. Yet, the infamous atom is the holy grail for all governments in their quest for more taxes and total control.

CARBON DOSSIER
CARBON TAX IS A TAX ON LIFE ITSELF

by
Professor Jon Swift

May 15, 2023

CARBON TAX* is the *raison d'être* for global warming and climate change. It is the holy grail for all governments. The tax was conjured up by the prophets of the carbon apocalypse. Its purpose is to make money, not save the world. Carbon Tax justifies government control over all human behavior.

*Carbon Tax by any other Name is still a Tax

ARTICLES & RESOURCES IN NEWSLETTER

The End of Carbon Taxes . . . All citizens on the planet celebrate the **Good News** that global warming has ended. There is more reason for people to fret over alleged increases in human-caused CO2 in Earth's atmosphere. This good news has been ringing the bells for 25 years (some say 35 years) but the sounds of the bells have been muffled and covered up by dark forces that do not want to permit any sounds that might be interpreted as a cause for celebration.

Class Action Law Suit . . . More attorneys join the team. Most have their fees paid by corporations where they work. . .

Science of the Law Suit . . . Scientists discover additional ways to prove that global warming has hit the pause button . . . Greenhouse gases is only one of many hypotheses. Our fear and hatred of carbon are only relevant, if the greenhouse gases theory wins out against the other theories on what drives warming and cooling.

Nations with Class Action Law Suits Available to Citizens . . . this is a list of 20+ nations which have Class Action or similar suits, which their citizens can use: Argentina, Australia, Brazil, Canada, Chile, China, Denmark, Finland, Indonesia, Israel, the Netherlands, Norway, Portugal, South Africa, Spain, Sweden, Taiwan, and the United States. At least four more— Austria, England, France, and Poland—plus the European Union are said to be debating the adoption of such a procedure in their systems.
